

Join from anywhere

StarLeaf web meetings can be joined from any location, including meeting rooms, boardrooms and huddle spaces. Those not in the office can join using the StarLeaf app on their desktop, laptop, mobile phone, or simply from within a browser.

Seamless interoperability at no extra cost

For organizations who already have third-party video conferencing equipment, it's easy to join a StarLeaf video meeting with StarLeaf's unparalleled interoperability. Whether you're on StarLeaf, Cisco, Microsoft Skype for Business/Lync, Polycom or Lifesize, joining a meeting is simple.

Highlights

- Easily schedule one-off or recurring meetings and share and update meeting details, with calendar integration for Microsoft Outlook and Google Calendar.
- Allow users to quickly and easily join calls from any device and any location.
- Guests can easily and instantly join meetings from their browser, with no need to download software.
- Join meetings quickly without technical assistance, with a single Join Now button for scheduled meetings.
- Global audio dial-in telephone numbers
- Full interoperability with Skype for Business
- Extend your reach and bring together as many people as required, with unlimited guest invitations.
